RE: Review and approval of TDI CCR standards

Dear Sir,

Over the years Technical Diving International, TDI has enjoyed the working relationship we have formed with rebreather manufacturers. At each step along the way, TDI has been completely transparent in our training standards along with the material development process and changes. During this time we have always kept manufacturers informed and we greatly appreciate your feedback, comments, and continued support. TDI would like to continue and renew this process.

Along with this letter you will find the TDI CCR standards for diver and instructor at the following levels:

- Air Diluent
- Air Diluent Decompression
- Helitrox
- Mixed Gas
- Advanced Mixed Gas

If you approve of the TDI CCR standards as they are, please sign and date this letter in the space provided and return it back to me. If you have any questions or comments please do not hesitate to ask, I would be happy to clarify or address.

Sincerely,

A handwritten signature in black ink that reads "Brian R Shreve".
